

Building Management Systems Capability

Delivery of a Positive Safety Culture

A Plant that is well designed, operated and maintained within established safety cases to ensure they operate at a tolerable risk.

Processes that are robust and focused on prevention of events, problem identification and resolution.

People who are well trained, follow Procedures, demonstrate a questioning attitude, uphold the highest standards and coach each other to improve those standards.

Our BMS Capability

Crossrail Limited / NG Bailey

- 47km meters of control cabling
- 87 Handovers
- 15km of fibre

What Our Customers Say

“Having worked with the team at L.B. Foster on the station's Building Management System, it was a logical step to engage them to sort out the SCS for each of the stations. What the guys bring to the party is the ability to get on with the job with minimum fuss, demonstrating an inherent understanding of what is required and delivering to tight deadlines.”

Project Manager, Crossrail

Thank you
